Bokashi Organko 1

As number 1 suggests, Bokashi Organko 1 was our first flagship product. It is designed to make the user experience as seamless as possible and at the same time ensure that the bokashi PROCESS is as effective as possible. Both of these aspects are covered by a practical handle, airtight lid, and a tap to easily remove the bokashi liquid.

With its 16-liter volume and 38-by-27-by-32 centimeter dimensions, Bokashi Organko 1 easily fits any kitchen. It is large enough to cover your indoor composting needs yet compact enough to be carried with ease even when full. Nonetheless, the indoor composter comes in 4 different color combinations for you to choose from to best match your interior. Moreover, to make the most out of the bokashi PROCESS, it is recommended to get two composting bins. Luckily, they can easily be stacked one on top of the other not to take any additional floor space.
